

UPPER BLACKSTONE WATER POLLUTION ABATEMENT DISTRICT

SOLIDS PROCESSING FOREMAN

The Upper Blackstone Water Pollution Abatement District is a MA Grade 7 Wastewater Treatment Plant in Millbury, MA currently accepting resumes for a solids processing foreman.

The solids processing foreman performs, coordinates, schedules, and oversees the work activities of this division of the maintenance department. Responsibilities include disassembly, repair and re-assembly of various equipment including pumps, motors, engines, compressors, reduction gears, and all other operating and auxiliary equipment including belt filter press dewatering, dissolved air flotation, multiple hearth furnaces, and associated air pollution control equipment. Performs repair work of a difficult and skilled nature as well as exercising technical supervision over subordinate maintenance staff. Provides detailed records of daily work activities, accident reporting, tool and equipment inventories; and predictive, preventative, and corrective maintenance to the Facilities Maintenance Manager.

Foreman must provide technical supervision over the work of subordinate maintenance staff engaged in all aspects of mechanical preventive and corrective maintenance of the solids facility. Knowledge of basic computer skills, email, internet searches, and Microsoft Office Suite required. Must be skilled in reading and interpreting engineering drawings and maintenance manuals. Ten years of combined experience in general mechanical, construction or electrical maintenance work. Must pursue work with energy and drive with an emphasis on safety.
